

THE STORY OF UC

ATMOSPHERE

- IT'S PURELY THE BEST -

Live in an environment that is 100% pure from all contaminants. This space is now controlled by a master control panel that can be accessed on your wall or on your phone. This panel controls the levels of gases in your room with one button.

Now UC provides all you need to live life to its fullest. Our uniquely designed living space is now delivering 100% pure air to optimize your health. This new pure way of breathing includes being able to up the O or the N in your room.

UC technology now allows us to manage the gas levels in our atmosphere. With our newly designed "contained units", we now can improve the quality of air and quite possibly extend life in the process.

NOTE: Traditional air consists of Oxygen (21%), Nitrogen (78%) Carbon Dioxide (.04%), Argon (.93%), and Methane
